

BLOCKCHAIN TOKEN RETAIL TRADING RISK DISCLOSURE

All new non-institutional customers of Mansa Musa Investments must be provided with this document upon new account establishment even if the customer does not intend to use the account for Blockchain Token Retail trading purposes. This Risk Disclosure Statement must be provided to every new account.

Dear Valued New Customer:

You should consider the following points before engaging in a Blockchain Token Retail-trading strategy. A "Blockchain Token Retail-trading strategy" means an overall trading strategy characterized by the regular transmission by a customer of intra-Blockchain Token Retail orders to affect both purchase and sale transactions.

<u>Blockchain Token Retail trading can be extremely risky</u>. Blockchain Token Retail trading generally is not appropriate for someone of limited resources and limited investment or trading experience and low risk tolerance. You should be prepared to lose all the funds that you use for Blockchain Token Retail trading. You should not fund Blockchain Token Retail-trading activities with retirement savings, student loans, second mortgages, emergency funds, funds set aside for purposes such as education or home ownership, or funds required to meet your living expenses. Further, certain evidence indicates that an investment of less than \$65,000 will significantly impair the ability of a Blockchain Token Retail trader to make a profit. Of course, an investment of \$65,000 or more will in no way guarantee success.

<u>Be cautious of claims of large profits from Blockchain Token Retail trading</u>. You should be wary of advertisements or other statements that emphasize the potential for large profits in Blockchain Token Retail trading. Blockchain Token Retail trading can also lead to large and immediate financial losses. We will do our best to mitigate those losses, but remember we do not control the market.

<u>Blockchain Token Retail trading requires knowledge of blockchain markets</u>. Blockchain Token Retail trading requires in-depth knowledge of the blockchain markets and trading techniques and strategies. In attempting to profit through Blockchain Token Retail trading, you must compete with professional licensed traders employed by securities firms. You should have appropriate experience before engaging in Blockchain Token Retail trading.

<u>Blockchain Token Retail trading requires knowledge of a firm's operations</u>. You should be familiar with a securities firm's business practices, including the operation of the firm's order execution systems and procedures. Under certain market conditions, you may find it difficult or impossible to liquidate a position quickly at a reasonable price. This can occur, for example, when the market for a token suddenly drops, or if trading is halted due to recent news events or unusual trading activity. The more volatile a token is, the

greater the likelihood that problems may be encountered in executing a transaction. In addition to normal market risks, you may experience losses due to system failures.

Blockchain Token Retail trading will generate substantial commissions, even if the per trade cost is low.

Blockchain Token Retail trading involves aggressive trading, and generally you will pay commissions on each trade. The total daily commissions that you pay on your trades will add to your losses or significantly reduce your earnings. For instance, if a trade costs \$15 and an average of 29 transactions are conducted per day; an investor would need to generate an annual profit of \$158,775 just to cover commission expenses.

Blockchain Token Retail trading on margin or short selling may result in losses beyond your initial

investment. When you Blockchain Token Retail trade with funds borrowed from a firm or someone else, you can lose more than the funds you originally placed at risk. A decline in the value of the tokens that are purchased may require you to provide additional funds to the firm to avoid the forced sale of those tokens or other tokens in your account. Short selling as part of your Blockchain Token Retail-trading strategy also may lead to extraordinary losses, because you may have to purchase a token at a very high price to cover a short position.

Potential Registration Requirements. Persons providing investment advice for others or managing token accounts for others are not required to be registered now.
